Sai-Dharla (<https://github.com/Sai-Dharla>)

SUMMARY

Final-year AI & ML Engineering student focused on Artificial Intelligence and Python, with a practical approach to problem-solving, application development, and technology-driven solutions. Skilled at applying technical concepts to build practical solutions, improve workflows, and automate tasks, with an adaptable approach to learning and working with emerging technologies.

EDUCATION

Methodist College of Engineering and Technology, Hyderabad

Bachelor of Engineering (B.E.) in Artificial Intelligence & Machine Learning

Hyderabad

Expected Graduation: 2027

EXPERIENCE

Python Developer Intern

Current / Ongoing Internships

Skill Nexis

- Apply Python programming concepts to practical development assignments, focusing on building and implementing application functionality.
- Strengthen Python development skills through hands-on problem-solving, debugging, and project-based work.

Web Developer Intern

Current / Ongoing Internships

Data Alcott Systems

- Apply web development concepts through practical project assignments, developing frontend functionality for web applications.
- Developed FreshBite, an online food ordering website using HTML, CSS, and JavaScript, with responsive interfaces and interactive client-side functionality.

Python Developer Intern

Current / Ongoing Internships

Codec Technologies

- Work with Python through practical development tasks focused on programming logic and application-oriented problem-solving.
- Build Python-based solutions as part of assigned development work, applying programming concepts to practical use cases.

PROJECTS

RACGS — Resume Analyzer & Career Guidance System | Python · Flask · NLP · REST APIs · SQLite

- Developed a Python-Flask application for automated resume analysis, skill identification, ATS-oriented evaluation, job matching, and career guidance.
- Implemented REST APIs for user authentication and core application workflows, including secure password handling and session/token-based access.
- Engineered resume processing functionality to extract text, identify relevant skills, and generate structured insights from uploaded resumes.
- Integrated NLP-based analysis to evaluate resume content and support job matching and career-oriented recommendations.

Sunday — AI/Desktop Assistant | Python · Artificial Intelligence · Generative AI · Automation

- Developed a Python-based AI desktop assistant for interactive voice and text-based user interactions and task assistance.

- Integrated Generative AI capabilities to process user requests and support contextual responses and task execution.
- Implemented desktop automation features to simplify repetitive tasks and improve everyday user workflows.
- Designed an interactive assistant interface combining AI-driven responses, user input, and desktop controls into a unified application.

FreshBite — Online Food Ordering Website | HTML · CSS · JavaScript

- Developed a responsive food-ordering web application covering restaurant browsing, menus, product details, cart, checkout, and user account interfaces.
- Implemented interactive shopping-cart and order workflows using JavaScript data structures and client-side logic.
- Designed responsive and user-friendly interfaces with HTML and CSS, integrating JavaScript interactions across the application.

E-Commerce — Online Shopping Website | HTML · CSS · JavaScript

- Developed an online shopping website with product browsing, product details, and interactive shopping functionality.
- Implemented client-side interactions using JavaScript to support product selection and core shopping workflows.
- Designed responsive product-focused interfaces using HTML and CSS for a structured and user-friendly shopping experience.

TECHNICAL SKILLS

Programming: Python, C

AI & Machine Learning: Artificial Intelligence, Machine Learning, NLP, Scikit-learn

Data & Analytics: Pandas, NumPy

Backend & APIs: Flask, REST APIs

Databases: SQLite, SQL

Frontend: HTML, CSS, JavaScript

Tools: Git, GitHub

Currently Learning: MERN Stack Development, Data Analytics

CAREER FOCUS

Artificial Intelligence · Python Development · Full-Stack Development · Data Analytics
